-  **High Threat**
-  **Moderate Threat**
-  **Slight Threat**
-  **No Widespread Threat**

***Threat levels are based on FEMA
Region 6 criteria. State or local
threat level criteria may differ.**

Hazardous Weather

Warm, dry and windy conditions will create fire weather concerns for Monday afternoon. There is a Fire Weather Watch in effect from 2 pm to 7 pm MDT Monday for southeast New Mexico, the Guadalupe Mountains, and the Van Horn and Highway 54 Corridor.

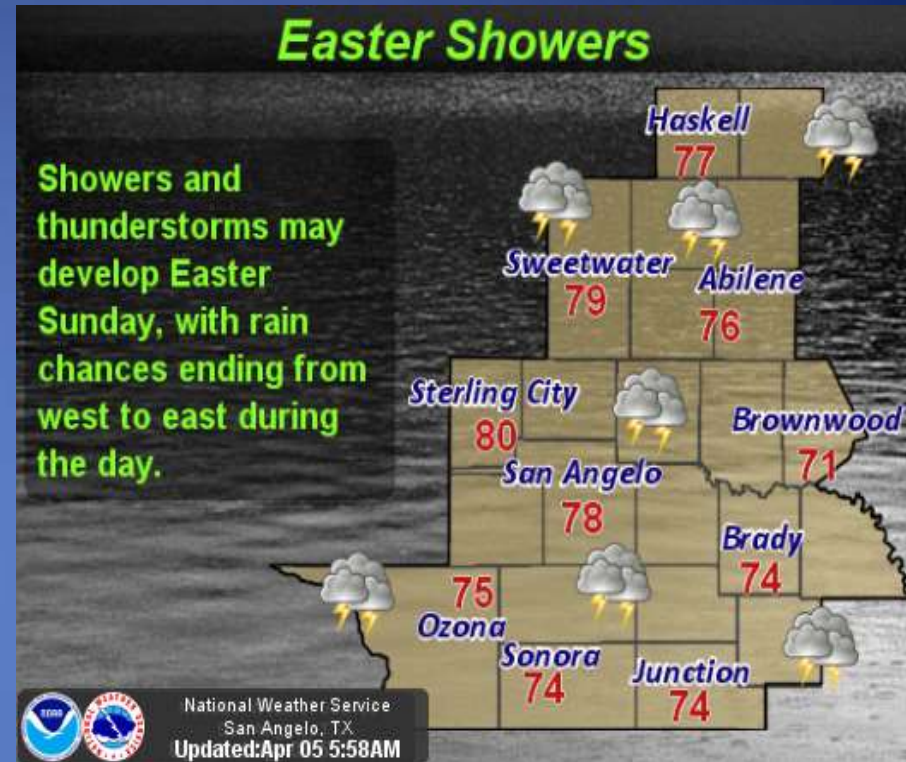

After morning clouds, very mild southwest winds and clearing skies will push highs near 80. Some thunderstorms are expected later this morning and early afternoon, mainly east of the Caprock.

Hazardous Weather

The bulk of the showers and thunderstorms will shift to the east of I-35 this afternoon. Cloud to ground lightning and brief heavy rain will accompany some of the storms as they move east. Average rainfall amounts this morning will range from only a few hundredths of an inch across the west to over 1/3rd of an inch across the east. Some locations east of the I-35 corridor will pick up around 1 inch of rain.

Showers and thunderstorms may develop through much of Easter Sunday. Rain chances will diminish from west to east during the day. Highs will be in the 70s.
